

Important Notice for N/CG Customers

Effective March 10, 2015 No Leak Adjustments on Irrigation

Suggestions for Irrigation Backflow Inspection

(This does not apply to fire sprinkler systems which are tested separately)

Federal and State regulations as well as District Policies require that a backflow prevention device be installed where there is the possibility of a cross-connection with the public water supply. *Each device is required by law to be tested annually to insure that it is working properly.* These regulations are for your protection.

The District has contracted with American Backflow Inspectors (ABI) to perform the required testing. The cost will be \$60 *per test*. The District along with American Backflow Inspectors would like for every customer to pass their test on the FIRST visit. By taking a few basic precautions it will greatly increase your opportunity to have a passing result. It is the District's responsibility to see that each device is tested. It is American Backflow Inspectors' responsibility to see that the device is tested properly and it is your responsibility to see that it is READY to be tested. We take our responsibility very seriously.

American Backflow Inspectors will begin testing backflow devices beginning May 1st. Prior to their arrival, they will attempt to issue you a courtesy call to let you know when they will be inspecting in your area, however, failure to reach you does not relieve you of the responsibility to be ready for the test. We suggest that you take the following steps to insure that your device is ready:

- 1) Have your irrigation system running by May 1st in order to be ready for testing.
- 2) You will be charged \$60.00 each time a test is attempted, it is YOUR responsibility to be ready for the test or to have made arrangements with the District.
- 3) **No REFUNDS WILL BE GIVEN. Please use due diligence to prevent wasted trips.**

If you would prefer to obtain your test results via Email, please send your name, address and email to: Americanbackflow@abibackflow.com.

To see a schedule of when American Backflow Inspectors, Inc. will be testing in your area,

Please visit their web site www.abibackflow.com

If you have a backflow device, please read the "suggestions"
On the other side Carefully!
